

Obtaining a United States Mailing Address

Please set up two weeks in advance of coming on tour, so that your bank account application can be sent in.

Our recommended provider for a United States mailing address is Earth Class Mail. They will be able to forward, destroy or email your mail to your foreign address depending on your preferences/ needs. Earth Class Mail is one of the few service providers that will allow you to preview your mail online and decide when mail will be forwarded. (Some services providers will only forward mail once a month). Please visit their website for test-drive.

www.EarthClassMail.com

Earth Class Mail is always offering discounts to their new customers. Simply Google "Earth Class Mail Coupons" to see current discounts available.

You are not required to use Earth Class Mail for your United States mailing address. There are other companies that can provide mail forwarding services. (CA, TX, FL addresses are not recommended due to high corporate taxes).

Tip: Once you have set up your US Bank account and have your debit card, change the billing for this service to that debit card to avoid a fee for the US bank account, while avoiding the additional charge for international charges on using an Australian bank card.
