

US Mobile Phones

There are several cost-effective prepaid plans. We have been referring people to AT&T Wireless near our office. Phones run around \$30-\$35 plus activation, cost of minutes and sales tax which totals around \$85.

We currently have an option to rent a phone from Real Wealth Network that will come pre-programmed with all the contact information for Real Wealth Network, contacts on the tour, recommended hotels, and cabs for each city. There is a limit to the number of phones available and it is first come, first serve. The flat cost for the use of the phone for a tour is \$55 for unlimited domestic talk and text. We will provide you with packaging to send the phone back to Real Wealth Network at the end of your tour. These are not set up for international calling or data services (email, browser, music, video, etc.).

If you are interested in obtaining a phone, please use the link below to pay for the service now.

Another option is to check with your mobile provider about an international plan. Depending on your carrier these can be cost effective and convenient.
